Attachments: SkootRiverFloodHazard.pdf

Thank you for explaining a disaster recovery program that has not been activated in the Tweed area. We are not asking for help with our properties. Rather, our concern continues to be about Skootamatta River.

Our request is for funding under Section 39 of the Conservation Authorities Act, so that Quinte Conservation and the Municipality of Tweed can respond to the effects of the tornado and help mitigate a flood hazard.

Please forward my request back to the Minister responsible.

Thank you,
Craig Charlton

Good Afternoon Mr. Charlton:

Your letter to Minister Smith has been forwarded to the Disaster Recovery Assistance for Ontarians (DRAO) program at the Ministry of Municipal Affairs and Housing.

The Disaster Recovery Assistance for Ontarians (DRAO) program may be activated in the event a community is impacted by a sudden, unexpected, natural disaster that causes costly and widespread damage to eligible private property that is not covered by insurance. Under the program (if activated), clean-up of trees on residential properties is eligible only to the extent necessary to make the property safe and provide access. The program does not assist residential property owners with damage to wooded areas located away from the primary residence and does not provide funding for mitigation measures (such as clearing of debris from the river as a preventative measure).

The Disaster Recovery Assistance for Ontarians program has not been activated for the storm in Tweed in July.

Sincerely,

Disaster Recovery Assistance for Ontarians Program

Ministry of Municipal Affairs and Housing
